INTRODUCTION

At In&motion, we continuously meet the challenge of developing **protections among the most comfortable on the market.**

We collaborate intensively with each of our partners until getting our systems completely integrated to their equipment.

Invisible, ergonomic, without affecting the sensations.

OUR COMMITMENT : MAKE A BRIDGE BETWEEN SAFETY AND COMFORT

BETTER PROTECTING AIRBAGS

In&motion is specialized in the **engineering and industrialization of smart protection systems** that we integrate into partner brands equipment in order to provide to their customers **an additional level of protection.**

UNIVERSAL

- Compatible with any jacket*
- Worn under the jacket
- Wireless, no sensors on the bike
- 6 sizes S to 3XL

PERFORMANCE

- Extremely fast detection and inflation (<60ms)**
- Protect Spine, neck, thorax, abdomen
- 5* SRA
- CE certified airbag system
- Integrated CE back protector
- 25-hour battery Life

INTELLIGENT

- 100% autonomous
- Electronic crash detection system
- Embedded algorithms
- Connected and upgradeable technology

COMFORTABLE

- Light
- Breathable
- Ergonomic design
- Reusable

*Jackets certified for motorcycle or scooter use and meeting sizing requirements

**Medium value measured on various crash scenarios

A motorcyclist wearing a black helmet and leather jacket is riding a black motorcycle on a winding asphalt road. The road has a white line marking and a metal guardrail. The background is a dense green forest. The text "HOW DOES IT WORK?" is overlaid in white, bold, sans-serif font across the center of the image.

HOW DOES IT WORK ?

IN&MOTION TECHNOLOGY

IN&MOTION airbag technology is a perfect combination of 3 technological bricks creating together a smart wearable protection. Continuously updated by thousands of users. It's nowadays, 13 millions miles of collected data anonymously that improve the detection.

DETECT

Sensor data

With **embedded proprietary algorithm**, the system, also called "In&box" measures the position of the user **1000 times per second to detect a fall.**

PROTECT

Fast deployment

In less than **60 milliseconds***, the airbag is inflated at the optimum pressure, protecting the user from impacts. Covered body areas include **thorax, abdomen, neck and spine.**

Evolving technology
All collected **datas** thanks to a proprietary software and Apps will therefore **regularly improve the system and the detection strategy.**

PERFECT

DETECTION DEVICE : IN&BOX

DETECT

The intelligence of the system is contained in the **In&box** (box placed in the back of the vest), the «**brain**» of the airbag including the sensors and the algorithm. The latter can measure the position of the user **1000 times per second** to detect an unrecoverable imbalance, anticipate an impact and trigger the airbag.

For each use of the system (professionals and daily users), **the anonymous collected data expand each user's embedded algorithm.**

A finer detection for a protection performance always optimized*.

* Automatically activated after 5 minutes of immobilization. About 2 hours of driving per day.

** Updates available every 3 months (average).

PROTECTION : AIRBAG SYSTEM

PROTECT

Extremely fast in terms of detection and inflation, **in less than 60 milliseconds**, the airbag offers the best protection with a perfect volume that absorbs the impact and a large protection for critical areas like **thorax, abdomen, neck and spine**.

CE certified and zin1 integrating a CE back protector, it is the first **wireless & sensor less electronic airbag system** ranked **5 stars SRA**.

Combining electronics and personal protection, In&motion brings also an airbag system that **can be worn under any textile or leather motorcycle jacket**.

Versatile & Invisible
Wear under jacket

Re-usable (x3)*
After inflation process done by the user

Lightweight
3.3 ±0.2 LBS
1.3kg

Comfortable
Stretch & breathable

Protective
Spine, neck, thorax, abdomen

Integrated CE back protector
CE EN1621-2 level 1

Certified airbag protector
5/5 stars SRA**

*Warranty – Respecting carefully the after inflation procedure

** Independant French ranking (similar to SHARP ranking for helmets)

APP & DATA : MY IN&BOX

PERFECT

The In&box unit is supported by the app "My In&box" for both Android and iOS that once configured to the box allows **automatic downloads and installation of updates**, real time battery level and system connection status.

The user benefits from **all the features and information's relating to its In&box**, from its activation to the daily operations.

The In&box is totally **independent and autonomous**. It doesn't need to be connected to the application to detect your movements and trigger airbag inflation.

Available on iOS and Android

Compatible Bluetooth Low Energy (BLE)

- Account creation and In&box activation
- Dashboard
- Wi-Fi network paired
- Battery level
- System and inflator connection status
- Update alert and downloading
- Tutorials and post-inflation procedure

PROS OF EACH PLANS

Pros for the REVOLUTION Plan (Lease option):

- Spread over cash out
- Make the airbag very accessible in price
- Stop payments when you are not riding
- Quick service : get a new one before you have to send the damaged one (Unlimited warranty protection)
- Can upgrade to the newest module after 3 years
- Buy option after 3 years at 99 €

Pros for the REGULAR Plan (Buy option):

- Immediate ownership
- Cost less over time
- Pay cash / one-time payment
- 2 years warranty

HOW TO GET IT ?

1

PURCHASE AN AIRBAG IN-STORE OR ONLINE AND GET YOUR IN&BOX

2

DOWNLOAD THE APP « MY IN&BOX » ON IOS OR ANDROID

3

CREATE YOUR ACCOUNT AND SUBSCRIBE TO IN&MOTION
